Ladders and Gangways

DESIGN-APPROVED GANGWAYS

Gangways from Lemvig Maskin- & Køleteknik ApS comes with a design-approval certificate issued by the

DNV · GL

The gangways are designed to meet the requirements from **ISO 7061:1993 (E)** and are tested to withstand an equal load on 5000N/m2.

The gangways are constructed with a new type of stringer-profile with build-in toe-board and lifting-lug.

As standard they can be provided with loose-stanchions, foldable-stanchions or with permanent handrails.

Anti-slip lugs are designed to fit a Ø2” bulwark-profile, but can also be delivered with our unique lock-hook.

All gangways can be delivered with a rotatable platform.
